Experience

Software Engineer

Connecticus Technologies Pvt. Ltd. | JAN 2026 – Present

Project: Polarion–Microsoft Teams Integration | client: Siemens DISW,

- Promoted to full-time role after internship and trainee phase based on performance.
- Leading development in a **full-stack enterprise integration** between Polarion ALM and Microsoft Teams.
- Designing and enhancing **event-driven architecture** using Azure Event Hubs and .NET Core middleware.
- Improving **Teams application UI** using React, Fluent UI, and TeamsFx SDK for better performance and usability.
- Implementing secure **authentication flows (OAuth2, SSO)** across Teams and Polarion.
- Developing and extending **bot capabilities** for workflow automation within Teams.
- Handling **production issues, debugging, and deployment readiness**.

Graduate Trainee Engineer

Connecticus Technologies Pvt. Ltd. | JUL 2025 – DEC 2025

Project: Polarion–Microsoft Teams Integration | Siemens DISW, Pune

- Continued development on a full-stack enterprise solution integrating Polarion ALM with Microsoft Teams.
- Enhanced middleware services to process Polarion events using **Azure Event Hubs** and exposed them securely to Teams clients.
- Improved user experience in the Teams tab app by refining React components and optimizing API interactions using Fluent UI and TeamsFx SDK.
- Added new bot features and ensured end-to-end authentication flow using OAuth2 and SSO.
- Actively involved in debugging, production readiness, and client delivery coordination.

Software Engineering Intern

Connecticus Technologies Pvt. Ltd. | Jan 2025 – June 2025

Project: Polarion–Microsoft Teams Integration | Siemens DISW, Pune

- Developed a Java-based plugin in Polarion to publish ALM events to **Azure Event Hubs**.
- Built middleware using .NET Core to consume and process events for Teams integration.
- Designed dynamic Teams UI with React + Fluent UI for work item creation, status updates, and search.
- Integrated Teams SSO and Polarion auth for secure user sessions.
- Contributed to bot command handlers, testing, and technical documentation.

Education

B.Tech INFORMATION TECHNOLOGY

Shri Guru Gobind Singhji Institute Of Engineering & Technology

2021/11 – 2025/05 | Vishnupuri, Nanded, India

CGPA: 8.64

Higher Secondary Education

Gopikabai Sitaram Gawande Mahavidyalaya

2021/02 | Umarkhed, Yavatamal, India

Percentage: 94.50%

Secondary School Education

Sakle Vidyalaya

2019/03 | Umarkhed, Yavatamla, India

Percentage: 90.40%

Skills

Technical Skills — Languages: Java, C, SQL, C# , Javascript Basic | **Frameworks:** Spring Boot, .NET Core, React | **Cloud & Tools:** Azure Event Hubs, AWS, Docker, Git | **Concepts:** Data Structures, OOP, System Design Basics | **Databases:** MySQL | **Communication**

Projects

GroundTransportSystem (In Springboot & React)

Developed a Ground Transport System as part of a capstone project during my internship, leveraging Agile methodologies, database design, and SOLID principles to create a scalable solution. Gained hands-on experience in OOP concepts and enhanced team collaboration skills through iterative development cycles.

PRAGYAA SITE 2k23

A responsive site madeup using tailwind CSS

This site is made for the Techincal fiesta, Managed the creation of interactive segments such as Home, About Us, Schedule, Gallery, and others, effectively presenting the club's endeavors. Showcased leadership, technical expertise, and teamwork in constructing a compelling online platform

Sign Language Animator

A Django Based Application

This is a group project done by me and my friends as the task of ITPM project work. Here in this project, we can convert a text or audio input to sign language animation. We developed this project aiming to help deaf people,

LIFI Based Data Transfer System

A microcontroller Based System

This is a simple project showcasing the data transfer utilizing the LED light and LDR sensor. Here we made an Arduino-based receiver and transmitters that can interchange textual data. Here we use C language(Arduino C) to program both receiver and transmitter devices.

Awards

Best Team Work Award 2025

Connecticus Technologies Pvt. Ltd | DEC-2025

- Awarded for exceptional teamwork and collaboration in a cross-functional team delivering an enterprise solution for Siemens DISW.
- Played a key role in aligning backend (.NET) & Java, frontend (React), and integration components, ensuring seamless communication and timely delivery.
- Actively contributed to debugging, feature development, and production readiness in a fast-paced agile setup.

Positions & Responsibility

Secretary

2023/08 – 2024/08 | E-Cell SGGSI&T

My responsibility is to see for overall cell activities. We are trying to cultivate Entrepreneurship in our college students through activities taken in the cell.

Event Manager

2024/01 – 2024/04 | PRAGYAA2K24

Here I am responsible for the overall execution of the college's technical fiesta well known as Pragyaa. Here I performed various task from designing of event activity, making successful execution of this activity, we designed various technical activities for student of various engineering branches

Assistant Web Developer

2022/11 – 2023/03 | PRAGYAA2K23

We have developed a fully functional responsive website for our college's technical fiesta, Pragyaa. I have the key responsibility of designing the whole UI and Keeping it responsive.
